DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-11,18 and claims 1, 12-17, 19-21 (all in part) wherein F is formula (4) , drawn to 1,4-DHPs, classified in classes 514, 546, 544, subclasses various.
 - II. Claims 1, 12-17, 19-21 (all in part) wherein F is formula (5)-(8), drawn to tricyclic hetero-compounds, classified in classes 540, 544, 546, 514, subclasses various. If this group is elected, an election of a single disclosed species is required.

The inventions are distinct, each from the other because of the following reasons:

The compounds of the groups above are independent and distinct since they differ greatly in chemical structure. The above groups would not be classified together under a scientific mode of classification. The compounds of group I would not be a reference under 35 USC 103 against the compounds of group II. Further note that the heterocyclic moieties cannot be considered as conventional substituents, but rather form a new core of the molecule each time that they are present. Since no common core is present, the inventions are misjoined.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, patent 6,350,766, having the compound of the following formula is **102** reference for the generic claim:

the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. A telephone call was made to Mr. Kelly on February 24, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jane T. Fan whose telephone number is 703-308-4705. The examiner can normally be reached on 7:00am-3:30pm, Monday-Thursday.
